

# INSTRUCTION MANUAL

1. Carefully unwrap your Hiking Challenge poster and place it on a flat surface.
2. Take the plastic scratch tool and use it to scratch off the designated trails, revealing the beautiful illustrations beneath.
3. When removing the film, try not to interfere with the non-scratching part of the poster, which has a matt laminate finish and may subsequently show scuff marks.
4. For the best results: Carefully remove the remaining parts of the scratched film with a thinner (for example: Nail polish remover) Caution: excessive use can damage the layer underneath.
5. Do not expose the poster to excessive heat and light, more extreme conditions may damage the product.
6. The wiper film may lose some of its elasticity due to UV rays and time - in such cases the film can be removed with a thinner applied to a piece of cotton wool or cloth.
